

## **AtlantaNAP announces Enterprise data center expansion: Adds 13,500 square foot raised floor**

ATLANTA January 28, 2009 AtlantaNAP ( [www.atlantanap.com](http://www.atlantanap.com) ), a premier co-location facility, today announced the expansion of its Enterprise Data Center 2 by adding another 13,500 square feet of available space. The expansion will be completed and available for occupancy on April 1, 2009.

Jeff Hinkle, President of the company, said “the expansion will serve strong demand from Fortune 1000 enterprise clients for active and disaster recovery space. As the economy has deteriorated, many CIOs are more concerned about their budgets and are optimizing their use of space with the AtlantaNAP. They minimize costs for the level of operations excellence they receive and are able to apply this budget to other critical areas in their department. It also allow for a redirection of capital outlay into a monthly expense, allowing the company to efficiently continue operations in this environment of tight capital.”

The new space has biometric authentication and all of the cutting-edge, yet cost effective features that other enterprise clients have come to expect from the AtlantaNAP.

The new Data Center was designed with the enterprise customer in mind, as it contains 36 inch raised floors and state-of-the-art high density power capability and hot air containment.

At the completion of this expansion, 50,000 square feet of a total of 56,000 sq feet will be built and online. There is currently 1800 sq feet available for immediate occupancy in Data Center 2.

“We believe this will bring in additional enterprise and corporate customers who are looking for the best facility, security and service that is offered in the industry,” said Hinkle. “AtlantaNAP boasts a security system consisting of a 10 foot razor fence, key carded entry, redundant security camera servers, biometric handprint scanning, and armed security guards.”

### About GNAX / AtlantaNAP

With more than fourteen years in the industry, GNAX and AtlantaNAP are trusted by thousands of customers that span almost every country in the world. It primarily operates out of its sister company AtlantaNAP ([www.atlantanap.com](http://www.atlantanap.com)) which owns and operates a state of the art data center centrally located in the historic West End area of Atlanta.
